

## **Quality Control Technician [QCT]**

This position requires practical and intuitive knowledge of commercial construction processes. The ability to work and think independently, while working within a project team environment, is critical.

The QTC role is to represent the client throughout the project, providing inspection and quality control services and will require continuous interaction with client personnel, architects, engineers, contractors and material vendors. Development of written reports, punchlists, and non-compliance summaries will be required.

Successful candidates for QCT will possess the following:

- High School diploma or equivalent
- Minimum of 15 years experience working in the commercial construction industry (Facilities, or GC preferred )
- Above average problem-solving skills
- Excellent written and verbal communication skills [English fluency required]
- Superior organizational skills
- Working knowledge of computer applications including word processing and spreadsheets
- Working knowledge of the commercial building process including mechanical, electrical, plumbing and architectural systems
